22nd Annual

FLECKVIEH BULL & FEMALE SALE

DECEMBER 5TH 2026

2PM On the Farm Valleyview AB

WELCOME

Tony & Annabelle

We would like to remind potential buyers of a few things:

- We have moved our sale time to 2PM.
- All lots are delivered for free within Western Canada

Welcome to our Fleckvieh Bull and Female Sale.

This is our 22nd year of offering powerful Fleckvieh genetics to the beef industry. It would not have been possible without all of our past buyers; we are proud to have earned the confidence of so many repeat customers over the years.

The beef industry is demanding larger-framed genetics. At Wolfe Farms we have always believed in pushing the limits for size and growth within the Fleckvieh breed to help meet this demand. Our genetics will help you add more performance to your calf crops. The extra age and high-forage rations that our unique breeding program is centered around, produces bulls and females that possess great longevity.

This year, we are excited to offer eighty-eight powerful Fleckvieh bulls, fourteen open Fullblood heifers and twenty-six registered bred heifers. Our open heifers are left unexposed so that they can better integrate into a January calving program. Some of these females will be hard to part with, but with the acquisition of heifers from Wolfe's Fleckvieh, we had to make room somehow.

Another attribute that makes us unique is that we carcass-ultrasound all of our sale bulls and heifers, as well as our own replacement heifers. We are one of the few Fleckvieh breeders that do this. We believe it is so important to look at the big picture, and have this data available to you. Once you get a reputation for steers with superior yields and marbling, the feedlots will be more interested in your calves.

Our Fleckvieh-influenced commercial bred heifers were well received the past three years, so we have an even larger group to choose from this December. There are over a hundred and fifty bred for January 20th (4 week exposure) and sixty bred for March 25th calving. Exposed to Fleckvieh bulls, they are carrying calves that should be easy to market. Be sure to check out their videos. With your feedback, we will be offering some of these females in smaller packages than in previous years.

We have four new herdsire groups in this year's sale. We thought Michelob was the most admirable bull Kuntz' had on offer in 2024. So far, his sons and daughters have impressed us with their thickness and quiet dispositions. We also have three new home-raised bulls; Kaslo, Kelowna and Kane. We love to keep some bulls back each year to broadcast the genetics of some of our top females and cow families.

Lastly, thank-you to Stefon Beechinor and Mackenzie Stout for photographing all our sale animals. I would also like to thank my employees and family for all the hard work they put in throughout the year. It's definitely a team effort to put together this sale each Fall.

If you have any questions about our breeding program or this year's offering, please don't hesitate to give me a call at 780-524-9322. You are all welcome to tour the cattle ahead of the sale.

We hope to see you Saturday, December 5th, as we celebrate 22 years in the business. And be sure to stick around after our 2:00 p.m. sale (new start time) for Annabelle's juicy smoked brisket and a side of Great Grandma's famous onion salad.

Tony

Herd Health & DNA Testing

All animals are on a full herd-health program. In addition to IBR and 8-Way, bulls recieved Fusoguard and a Fusoguard booster in June. They will recieve a third dose again in the Spring prior to delivery.

All registered lots are 100K Sire-Verified.

Delivery and Wintering

For all bulls and heifers, we offer free delivery within Western Canada. Bulls are Wintered for free and delivered in the Spring.

- Scur-polled.
- His dam is a full sister to our past donor Cheyenne. We unfortunately lost Elaine last Winter. She was an extremely productive cow and we are happy to have two daughters in our herd.
- A definite female maker, with another top cow, Brandy, as Kaslo's dam.
- Added size from both Kaslo and Geronimo.

	7.3	3.1	76.3	120.6	37	3	75.2

- This bull will "Nudge" you in the pen. He is very quiet.
- Powerful Kane son from a Walker cow. Walker was the highseller from Red Willow Ranch that year.
- Growth and thickness. Ranked 7/94 for adjusted yearling weight- and he's just from a first calver.
- His young dam is becoming a favorite. Her second calf is one of our best heifer calves this year.

WOLFE FABBY 293F

- A well-mannered girl that should have a tidy udder when she calves.
- Her granddam, Abby 788A, is the second oldest cow on the farm.
- Combined with Brandy through Kaslo, she should display phenomenal longevity.
- Her dam is one of our favorite cows. Beautiful udder and temperament.

Exposed to BLL REBEL YELL 489M (1531730) from July 1- September 3.

BLL REBEL YELL 489M

1531730 | BLL 489M
